AI Chilled / AI Frozen

Stallion Name & Location:

# ARTIFICIAL INSEMINATION

- We ideally want to first see mares when they are either on the first day of season or ideally mid-week approximately 1 week after being on season - if unsure when she was last in season, we can scan them to see where they are.
- Owners need to organise the semen themselves and know what days the stud collects for the stallion, how much notice the stud needs and how the semen is going to get to us including organizing the courier.

## AI Chilled/Frozen

- Charge is per scan with initial scan being \$120/scan and subsequent scans being \$95/scan
- It would be reasonable to expect average of 5 scans for chilled AI and average of 10 scans for frozen AI
- Extra charges to consider are travel, stable fees, uterine flushing, AI charge or any drugs used (see below)
- Please note that frozen AI involves the mare being scanned every 2hrs starting at 6.30am during the day of insemination and therefore she needs to be stabled at the clinic in Toogoolawah for this day.

*Note: if your horse is >30kms from the Toogoolawah clinic we recommend that you bring them to the clinic for scans.*

## EXTRA CHARGES \*\*

Drugs (prices are only approximate depending on dose required)

- Estrumate – used to short cycle, also called PG – 2ml approx. \$32
- Deslorelin – used to induce ovulation – 3ml approx. \$120
- Oxytocin – used to remove any excess fluid in the uterus – 3ml approx. \$27

Pre/Post Insemination Flushing

- For mares who exhibit uterine fluid retention pre or post insemination and require flushing: \$110

Pregnancy Scans

- Pregnancy Scan post AI: \$95

Stable Fee

- For frozen AI where mares are kept at clinic in stable. Owner is responsible for providing all feed.
- \$70/day for stable use

Travel

- \$2.30/km – return from closest clinic

Artificial Insemination

- \$162 for fresh or chilled
- \$210 for frozen

Semen Storage Fees (if applicable)

- Short Term Fee <Month: \$33 (covers up to one month)
- Semen Storage - Extended Fee/Quarter: \$99 per quarter (applied after the initial month)
